## Letter from the Founder

In college, my professors liked to torture their students by assigning mountains of reading.

Yet, I **actually wanted to do the reading**: I wanted to participate in discussions, do well on exams, and **absorb the knowledge**. On top of that, I loved reading books, articles, and papers about my favorite topics. I **just couldn't keep up with the pace**.

So I built SwiftRead to help me instantly 2-3X my reading speed and breeze through all my reading in a fraction of the time.

SwiftRead is now the top-rated speed reading browser extension and used by readers in over 100 different countries. Many of those users have upgraded to the PRO version to supercharge their reading and learning.

It's my mission to help people everywhere read better and learn more. I'm excited to keep improving SwiftRead as an innovative product that people love. I'd love for you to give SwiftRead PRO a try.
